

Snowdonia National Park covers 838 square miles and is one of the three natural parks found in Wales. The scenery and activities that can be done here are so diverse that you will be spoilt for choice. Whether you are coming for pulse raising activities or simply to stand and admire the Snowdonia Mountains, lakes, rivers and forest. The landscape is breathtaking and unique. There are nine mountain ranges and they cover half of the national park's surface with some of the peaks reaching over 3,000 feet. The mountains are not the only attraction there are many river gorges, waterfalls and valleys. Forests are filled with ash, oak, rowan, hazel trees and there is also 23 miles of coastline located in the park. The park's historic Snowdon Mountain Railway climbs to the summit of Wales's highest mountain, Mount Snowdon, offering views across the sea to Ireland. With trails leading past sheer rock faces and grassy slopes speckled with flowers, Snowdon is one of the UK's most popular mountain hiking destinations.
